Starter recall and comparison

In our last group piece, which cue helped us stop?

Recall the actual Week 5 group piece or quiet role. Accept the square stop cue or the actual agreed sign. Invite a clue from the real work. Do not assume that a public performance happened.

How did you help with the piece?

Accept the actual role, including giving a cue, pointing through the pulse, making a quiet record or supporting the art cue. The pupil may pass.

We do decision checkpoint

Which note shows what went well?

A · We stopped at the square cue.

B · It was good.

A names one thing we can check. Use it only if it matches the real work.

Release the short review task when pupils choose A and point to a matching real moment. If they choose B alone, keep their positive comment and model adding one visible or audible detail. Repeat with another actual example, then use the parallel check.

A note says the start was clear. Which clue would help you check that?

Use an actual start cue, sketch or observation from that start. A stop cue alone does not show how the start went.

Staff feedback

At check-out, record E for today's lesson against each pupil's target on the evidence app.

At check-out, record E for linking a strength to a real clue against the pupil's target.

Regulation: check the colour-and-word card at Arrival and after You do.

Optional: show or tell an adult what you changed after feedback. You may use your usual response mode or pass.

Mark R only after the pupil has responded to the next step and an adult has received and reflected the response.

Adult ticks the improved work.
