Staff Answers

Starter recall and comparison

1. In Week 4, what made an audience comment useful to the makers?

It named a specific moment or layer and gave a clear reason.

2. Compare example A and example B. Why does a shared start and stop cue help the audience follow?

Example A gives everyone a clear role and shared cues so the sequence stays together.

We do decision checkpoint

Which comment gives the group something it can act on?

A · The stop cue was hard to see.

B · It was fine.

A. It names a specific feature that the group can adjust and test.

If pupils choose A and identify what to adjust, release the short planning task. If they choose B, model comparing the two comments against the sequence diagram and run the parallel check.

A listener says they missed when the artwork entered. Which cue should you check?

Check the artwork cue in step 3 and make sure it is held in clear view.

Staff feedback

At check-out, record E for planning a role and testing cues in a group share against the pupil's target.

Regulation: check the colour-and-word card at Arrival and after You do.

Optional: show or tell an adult what you changed after feedback. You may use your usual response mode or pass.

Mark R only after the pupil has responded to the next step and an adult has received and reflected the response.

Adult ticks the improved work.
