Introduction to Vocational Skills and Workplaces

What I am learning

I can name common vocational skills.

I can describe different kinds of workplace.

I can say which vocational skills I already have.

You already use some skills that help at work. A kitchen and a garden need people who can follow steps, work safely and help a team.

Introduction to Vocational Skills and Workplaces

The task steps

Name the task and the workplace.

Name a skill the task needs: follow steps, stay safe, keep to time or use a tool.

Give one example of when you used that skill. Say what help you had.

Choose one skill you want to build. Link it to kitchen or garden work.

Introduction to Vocational Skills and Workplaces

Words and worked example

vocational: Practical skills linked to work.

workplace: A place where people work.

skill: Something you learn to do.

reliable: Doing what you agreed to do.

teamwork: People doing their parts together.

transfer: Use a skill in another task or place.

I helped lay out empty pots for a garden task. I followed the picture steps and put the pots in the right place. An adult read the steps. Following steps is my skill. It can also help me set out cups in a kitchen.
