Tools, Equipment and Safe Use

Quiz answer key

Arrival 1: A: one chooser and one checker - The chooser and checker each have a clear part.

Arrival 2: Ask what help they want - Ask what help they want so they keep their own part.

Arrival 3: Agree a fix and check again - Agree who will do the missing part, then check again.

Tools, Equipment and Safe Use

Exit answer key

Exit 1: A trowel - A trowel is made for small digging tasks.

Exit 2: Adult permission and training - Ask the adult. Use only kit you have permission and training to use.

Exit 3: After agreed cleaning and safe storage - Safe tool use includes cleaning and storage by the agreed method.

Tools, Equipment and Safe Use

Hinge and task checks

A tool looks damaged. What next?

Stop and tell the adult. Do not test or fix the tool yourself.

Correct sequence: Name the job. / Choose the tool. / Get the adult check. / Clean and store as agreed.

A trowel suits a small planting hole. A whisk suits mixing. I would not use a whisk to dig. I ask the adult to check the tool and show safe use. On this page I match cards; any real tool use is off screen with the adult.

I can name a tool and its job.

I can name the tool and record the use and care checks.

I can explain why a tool fits the job and how to leave it safe.

Tools, Equipment and Safe Use

Misconceptions

Matching a tool picture proves safe use. Correction: Paper work is rehearsal. Staff record any real use and help separately.

One grip rule fits every tool. Correction: Follow the adult model for that tool and task.

Cleaning is a separate optional job. Correction: Cleaning and safe storage leave tools ready for the next person.

Accept a different defensible example if the pupil links it to the task. Record a pass as a pass; never guess an answer or outcome.
