Staff answers and response guide

Review my making skills and evidence

These are possible responses and task guides, not learner observations. Accept a defensible answer based on the facts or actual work. Record each learner's reasoning and support.

Card key

Card	Judgement or step	Possible action
A	Planning evidence. The record shows their marking work.	Link it to planning and measuring; note support.
B	Making evidence. The pupil and adult did different parts.	Record the pupil's making and the adult help.
C	Testing evidence. An actual result and stop are recorded.	Keep it and explain what it shows.
D	Evaluation evidence. The reason comes from the test.	Keep the link; label the change as proposed.
E	Evidence gap. Preparation is present; delivery is unconfirmed.	Check for an authentic record or plan a later exchange.
F	Not pupil evidence. The work belongs to an adult.	Label it as a model and find the pupil's own work.

Model and hinge

Fictional review: Jo links a plan to measuring. The marked length shows what Jo measured. Jo records: an adult helped me hold the ruler. The test record is missing, so Jo marks a gap. Next step: find the real record with staff. Staff bank only checked work and record the gap.

C. A model alone does not show a recorded test or evaluation. Check for an authentic existing record; if none exists, record the gap and plan a suitable later opportunity. Do not invent or backdate evidence. Reteach by separating a pupil record from an adult model.

Individual evidence key

Check each claimed skill against actual work and who did it. Keep honest not-yet or missing entries. Source award labels are preserved in school staff mapping and masked in Public; no unit criteria, registration or completion is inferred. Bank only real learner evidence and record actual location/status.

Feedback boundaries and next teaching

Card A: A staff-prepared blank is not evidence that the pupil marked it.

Card B: Do not claim full independence.

Card C: An unsuccessful model can still evidence testing and evaluation.

Card D: Do not claim the improvement is proven without a retest.

Card E: Do not invent an audience or question.

Card F: Blank forms and adult answers do not prove attainment.

Common misunderstandings

Neatness is not the same as independence. A stopped test can still provide valid evidence. A filled checklist is not proof that every skill or award is complete.

Teaching boundary

No fabricated, copied or backdated learner evidence. Keep photos and work references in approved staff storage. No new build or load test is required. Any gap leads to a future support plan, not a false completion tick.

Feedback

If a reason is missing, return to the fact or actual work. Re-model a different example, then keep the learner's own revision. Use NS+ and the learner response, in the same colour, on the same page or usual mode, before R. E means evidence actually banked. Keep safeguarding records separate.

Assessment boundary

LAUNCH-DT-W7-E1 contributes to the source assessment. No criterion, registration or award completion is invented. Sources: FACTS_LEDGER.md.
