Knowledge organiser (BASE) — Curate the studio showcase

Pathway: BASE · Week 7 Part 2 · Big question: How do we arrange and label our relief panels for a class art show?

Core studio focus

Family: Studio suite

Big question: How do we arrange and label our relief panels for a class art show?

• Write a neat art wall label card with your title. Art tools.

• Help arrange the finished relief panels in a straight row on the display board.

• Walk the art show. Leave one kind sticky note for a friend.

Essential vocabulary

• set out: To choose and arrange artworks neatly so people can enjoy them.

• art show: A wall or table display where finished art is shared.

• label card: A small card next to an artwork naming the title and tools.

• eye level: At a comfortable height to look at without bending or stretching.

• space: Leaving an even gap between each picture on the wall.

Three-step studio method

Step 1: Write the art wall label card: I write my title 'Steel span'. Art tools 'Card, foil, and chrome paint' in clear black pen.

Step 2: Space the panel on the display strip: I place a hand-width spacer card next to the last panel so my board sits in a straight even row.

Step 3: Write a kind art show note: I look closely at a friend's panel. Write: 'Great shiny bolt dots on your arch!' on a sticky note.
