Knowledge organiser (TRACK) — One skill, three tries, one log entry

Pathway: TRACK · Week 2 Part 1 · Big question: How does repeating one studio skill across three controlled trials build measurable control?

Core studio focus

Family: Identity and studio log

Big question: How does repeating one studio skill across three controlled trials build measurable control?

• Select one target skill from Week 1 (tonal shading, cross-hatching, or ink gradation).

• Complete three progressive trials (Trial 1 baseline, Trial 2 pressure adjustment, Trial 3 refined control).

• Record a clear studio log entry explaining what changed between Trial 1 and Trial 3.

Essential vocabulary

• trial: A deliberate practice attempt focused on improving one specific technique.

• pressure: How firmly or lightly you press the tool onto the paper surface.

• cross-hatching: Building dark tone by layering intersecting sets of parallel lines.

• control: Making the tool produce the exact tone and edge you intend.

• progression: Visible step-by-step improvement across consecutive attempts.

Three-step studio method

Step 1: Complete trial 1 (6-minute baseline): I draw my identity form in Box 1 using cross-hatching and stop to check where the tone looks patchy.

Step 2: Adjust angle and pressure in Trial 2: I write 'closer line spacing' under Box 1, then complete Box 2 with tighter, steadier strokes.

Step 3: Resolve trial 3 and write the log note: I complete Box 3 with three smooth tonal layers and write my reflection comparing Box 1 and Box 3.
