Teacher and cover plan — Plan and rehearse a studio skill demonstration

Pathway: TRACK · Week 6 Part 2 · Big question: How do we break a practical relief or surface technique into three teachable steps for peers?

Learning goals and studio kit

• Choose one studio technique you mastered in this unit (card lamination, foil embossing, or ink-and-wipe patina).

• Design a three-step visual demonstration board (Step 1 Setup, Step 2 Action, Step 3 Check) with real mounted sample strips.

• Rehearse a clear 90-second tabletop skill demonstration with a partner.

Studio kit: A3 three-step demonstration boards, small card/foil sample tiles, glue sticks, thick marker pens, cue cards, studio timers

Arrival and starter

Arrival: Think about the best practical demonstration you have watched in art or tech. What made it easy to follow?

Starter question: Why is gluing three real stage-by-stage sample tiles onto your demo board better than only writing sentences?

Teacher model (I do)

Step 1: Pick one focused technique: I choose 'Embossed foil with dark ink-and-wipe patina' and label my three board boxes Step 1, Step 2, and Step 3.

Step 2: Build and mount the three stage samples: I glue a raw embossed foil tile in Box 1, an ink-coated tile in Box 2, and a wiped high-contrast tile in Box 3.

Step 3: Add bold tips and rehearse: I write one keyword tip under each tile ('1. Foam mat under foil', '2. Brush dark wash in grooves', '3. Wipe high ridges gently') and rehearse with my partner.

Practice routes (Supported / Independent / Aspire)

Supported: Three stage tiles mounted with tips and rehearsed once with a partner.

Independent: Three-stage exemplar board completed, cue card written, and partner rehearsal refined.

Aspire: Exemplar board, live-try mini-kit, and rehearsed hands-on coaching sequence.

TA and cover notes

TA focus: Provide pre-cut 5 cm x 5 cm card and foil blanks so pupils can quickly assemble their Step 1, Step 2, and Step 3 exemplar tiles.

Staff prep: Staff preparation only: review a short guide on scaffolding peer-to-peer tabletop studio demonstrations.
