TA studio brief — Designing a peer studio workshop project

Pathway: SUMMIT · Week 5 Part 2 · Big question: How do we design a structured, safe, and inspiring practical workshop to lead our peers in building a relief study?

TA practical setup & focus

Provide zip-wallets for each pupil so they can store their pre-cut participant blanks alongside their A3 Workshop leadership Board.

Studio kit: A3 Workshop leadership boards, 6 cm greyboard/foil/corrugated sample blanks, cutting mats, safety rulers, PVA, dark wash, metallic dry-brush pigments

Key words to prompt

• workshop brief: A structured teaching plan that guides participants to make a finished study in a set time.

• scaffolding: Breaking a complex studio technique into manageable, foolproof stages with visual models.

• risk assessment: Identifying practical hazards (cutting edges, foil corners, spills) and putting safe controls in place.

• contingency: A smart backup plan if a material runs low or a participant's piece lifts.

• facilitation: Guiding and coaching peers calmly so they succeed with their own hands.

Supported route steps

1. Choose your workshop skill (foil embossing or dry-brush relief).

2. Make and glue three small stage tiles (Step 1, Step 2, Step 3) onto your Workshop leader board.

3. Tick the materials you need on the kit checklist and write one clear safety rule.

4. Prepare four blank base squares in a wallet ready for Week 6.

Check: Three stage tiles mounted, kit list ticked, safety rule written, and four participant blanks prepped.

Review & exit support

Exit question: In workshop design, why do we prepare physical Stage 1, Stage 2, and Stage 3 exemplar tiles AND pre-cut base blanks?

Staff note: Staff preparation only: review how to guide pupils in designing a safe, time-bounded 15-minute peer studio workshop.
