Tier pack: Aspire route — Piloting, leading and adapting the studio session

Pathway: SUMMIT · Week 6 Part 2 · Big question: How do we run a live pilot of our workshop sequence, spot material bottlenecks, and adapt our instructions?

Aspire route studio steps

Step 1: Lead your live pilot while tracking exact split-times across Step 1, Step 2, and Step 3.

Step 2: Refine both your physical prep kit and your visual cue system to eliminate dead time and support two confidence levels.

Step 3: Mount the peer pilot outcome alongside a critical evaluation of how live iteration improved your instructional design.

Success check

Split-timed pilot, upgraded dual-level cues, mounted peer tile, and critical evaluation.

Make-it studio planner

Diagnose your pilot run and lock in your workshop adaptation.

Options: Bottleneck: Cutting took too long, Bottleneck: Foil tore on mat, Bottleneck: Wash stayed too wet, Bottleneck: Dry-brush overloaded

Review checklist

[ ] Verify that your partner's pilot tile is mounted on your Pilot log sheet alongside your adaptation note.

[ ] Restock your participant wallet with fresh blanks so your tray is ready for Week 7.

[ ] Check that your upgraded visual cue is bold and legible on your Workshop board.
