Pupil studio resources & worksheet — Drafting a structured visual review

Pathway: SUMMIT · Week 7 Part 1 · Big question: How do we synthesise our exhibition field sketches and portfolio evidence into a structured critical review?

Arrival check

What separates a genuine 'Critical visual Review' by an art student from a casual online star rating?

[ ] Every claim is backed by specific studio evidence — naming the tonal contrast, the material process, and the lighting angle

[ ] You integrate your Week 6 observational sketches directly onto the review page as visual proof

[ ] You connect what you saw in the exhibition back to your own 7-week studio progression

Starter visual cues

Section 1 (Exhibition context & Thesis): Name the thematic focus of the show and state your central critical judgement.

Section 2 (Material & Tonal mechanics): Analyse how the lead artwork uses 5-value contrast, figure-ground tension, or relief patina (cite Moment 2 & 3 sketches).

Section 3 (Curatorial staging & Lighting): Evaluate how sightlines and raking light shaped viewer experience (cite Moment 1 sketch).

Section 4 (Personal studio Synthesis): Explain how this inquiry informs your own resolved portfolio and next targets.

Vote: In a critical art review, why must every analytical claim be paired with a specific visual example from your Week 6 field sketches?

Studio practice planner

Structure your illustrated Critical visual Review.

Shapes/Focus: Sec 1: Exhibition thesis, Sec 2: Tonal & material proof, Sec 3: Raking light & space, Sec 4: Personal studio link

Tools/Methods: Ref: [Fig. 1] Sightline sketch, Ref: [Fig. 2] 5-value map, Ref: [Fig. 3] Joinery close-up, Formula: Claim + Proof + Impact

Exit ticket

What are the three parts of the formula for a strong analytical sentence in an art review?

[ ] Claim + Specific visual Evidence + Impact on the Viewer

[ ] Date + Weather + Price

[ ] One word with no explanation
