Pupil studio resources & worksheet — Delivering the workshop and curating the exhibition

Pathway: SUMMIT · Week 7 Part 2 · Big question: How do we facilitate our live peer studio workshop and curate the collective structural installation?

Arrival check

Today brings our entire seven-week Studio suite together: facilitating your adapted peer workshop AND curating the collective structural installation. What makes a studio leader shine during live delivery?

[ ] Starting with a crisp 30-second safety and tool-angle check while pointing to Tile 1, Tile 2, and Tile 3

[ ] Using the adaptation you built in Week 6 so pacing stays smooth and everyone finishes a proud tile

[ ] Hanging the finished relief panels and workshop tiles together under raking light creates a genuine gallery installation

Starter visual cues

Phase 1 (Live workshop Delivery — 12 mins): Host your adapted studio workshop for your visiting pair/group using your 3 stage exemplars and prepped blanks.

Phase 2 (Collective curation & Lighting — 10 mins): Mount the major structural relief panels at eye-level sightlines with raking side illumination and museum labels.

Phase 3 (Exhibition walk & Summative evaluation — 8 mins): Collect participant feedback slips and write your final Leadership & Curation evaluation.

Vote: When curating our major relief panels alongside the smaller tiles made in today's workshops, how can we arrange them so the display looks architectural and unified?

Studio practice planner

Finalise your live workshop delivery and exhibition curation plan.

Shapes/Focus: Workshop: 30s safety + 3-tile guide, Workshop: Live Week 6 adaptation, Workshop: Coaching with exemplars, Workshop: Participant tile cluster

Tools/Methods: Curation: 145cm sightline hang, Curation: 25° raking illumination, Curation: Formal museum labels, Curation: Zone intro statement

Exit ticket

Why does exhibiting the small tiles made by your workshop participants alongside your main relief panel strengthen the final showcase?

[ ] It demonstrates both your personal material mastery on the main panel and your ability to lead and pass on studio skills to

others

[ ] To hide the museum label

[ ] Because main panels are too small
