Backbone Detectives · Tier Pack · Aspire

Learning goal: I can use inside body clues to sort tricky animals and explain my choice.

Aspire Route (Book First)

Explain why a bat and a beetle are in different groups even though both fly.

Help: Both have wings, but inside a bat has __ while a beetle has __.

Optional Make It · Aspire

Make a 3-clue flip card

Fold three flaps for snake, bat, and lobster. Write the trap on the front and the inside proof under the flap. Keep your book notes too.

Word Help

vertebrate: an animal with a backbone inside

invertebrate: an animal with no backbone inside

evidence: a body clue that proves your choice

exoskeleton: a hard case on the outside of a body

Exit Check

What one clue proves an animal is a vertebrate?

Sort a snake and a crab, and give the clue for each.

Why can outside appearance lead to a sorting mistake?
