Model Plate Comparison · Teacher and Cover Plan

Learning goal: I can compare two meal plates and make food swaps so a plate matches the guide.

Scheme Outcome

BASE Science scheme of work, Unit 1 (Skeletons, Muscles and Nutrition), Topic: Compare sample meals against the balanced plate guide and suggest swaps.

Compare two model plates against the balanced plate guide and choose practical food swaps to improve balance.

Success Criteria

I can check Plate A and Plate B against the balanced plate guide.

I can spot which food group is missing or too big on a plate.

I can pick a sensible food swap and say how it fixes the plate.

Model Sequence (I do)

First, tick the checklist for Plate A: potato (starch), beans (protein), salad (veg), yoghurt (dairy), water.

Next, tick Plate B: chips (starch) and sausage (protein), but 0 veg, 0 dairy, and sugary pop.

Finally, make two swaps on Plate B: swap half the chips for peas and swap fizzy pop for water.

Made by Matt

When we compare two plates, we use the same 4-point checklist for both.

Using the same checklist makes our comparison fair and clear.

We also check portion size: fruit and veg plus starch should fill most of the plate.

We Do & Hinge Check

Why is 'swap half the chips for peas and carrots' a better fix than 'throw the whole meal away'?

Answer: A. Smart swaps keep the good parts of the meal and fill the missing group.

Safe Practical & Card Setup

Compare the Plate A and Plate B cards using the 4-group checklist and place swap cards on Plate B.

Kit: Printed Plate A and Plate B mats, 4-group tick cards, and food swap cards.

Use paper cards only. Keep all comparisons focused on the model cards, never personal meals.

You Do Routes (Supported, Independent, Aspire)

Supported: Tick the groups on Plate A and Plate B, then pick one veg card and one drink card to fix Plate B. (Help: Plate B needs fruit/veg (peas or apple) and water.)

Independent: Complete the tick table comparing Plate A and Plate B, then write two swaps to balance Plate B with a because reason. (Help: Plate A has __, while

Plate B is missing __. I swapped __ for __ because __.)

Aspire: Explain why we use the same 4-group checklist on both plates and design a vegetarian swap for Plate B. (Help: Using the same checklist makes the test fair. For a meat-free Plate B, use __ for protein and __ for veg.)
