

Get a result

I can run a program, change one value and save my work.

Today we will change what a program does.

Open W01_Start.sb3 in Scratch.

You can point, say or write. Quiet working is available.

Your prediction

Both start at $x = 0$ and face right.

A

when green flag clicked

go to x: 0 y: 0

point in direction 90

move 40 steps

say Arrived for 2 seconds

B

when green flag clicked

go to x: 0 y: 0

point in direction 90

move 100 steps

say Arrived for 2 seconds

Which travels further right? Point to your prediction.

The blocks have an order

The green flag starts this script.

The blue blocks set the start and direction.

The next blue block moves the sprite.

when green flag clicked

go to x: 0 y: 0

point in direction 90

move 40 steps

say Arrived for 2 seconds

A fair comparison

Predict where 40 steps will finish.

Choose the next value together:
100.

Test it. Show what changed.

when green flag clicked

go to x: 0 y: 0

point in direction 90

move 40 steps

say Arrived for 2 seconds

Change one value: 40 to 100

The same start each time

Predict the finish after two runs.

Choose 100 or 200. Give a reason.

Run twice. Check the start block.

when green flag clicked

go to x: 0 y: 0

point in direction 90

move 100 steps

say Arrived for 2 seconds

Our guess can change after a test.

A safe save

- 1** File, then Save to your computer.
- 2** Use W01_MyCode.sb3.
- 3** Load the saved file and run it again.

The delivery marker

Our start is $x = 0$. The target is 120.

Choose a value. Point or say why.

Test together. Repair if needed.

Start $x = 0$

Target $x = 120$

move your value steps

Keep direction 90.

Your task route

Step by step

Use each small step and the number choices.

Main task

Reach 120 and test your message twice.

Challenge

Reach 160. Explain the finish after two runs.

You can change route. Point, say or write on every route.

Your delivery program

Reach the marker at $x = 120$.

Choose Courier's message.

Run twice. Check both finishes.

when green flag clicked

go to x: 0 y: 0

point in direction 90

move your value steps

say Arrived for 2 seconds

Use the help on your route sheet.

Your choice and its effect

Show the value you changed.

Show or say what happened.

Choose a message or tell us what helped.

What I said, and what it changed

Your teacher will listen and reply.

Save and reopen

Save your final Scratch file.

Load it and run it once.

Show one change you made today.
