

Week 3 Build the world · paper route

Paper route · GROW Computing · 40 minutes

Name: _____ Date: _____

Week 3 paper route. Build the world.

This is a full route to the AQA unit award.

It is not a rehearsal. It is not a worksheet to do while you wait for a computer.

You do not need a computer this week. You do not need the internet.

You need this pack, a pen, a wallet, and an adult who watches you work.

This week you make three sprites out of card.

A sprite is an object in the project that we can select and code.

Your Maze card, your Player card and your Finish card are your three sprites.

You will make them. You will name them. You will pick them out when an adult says a name.

Then you will move a counter through the maze and write down where it goes.

Your adult watches you do it and writes down what they saw.

That written record is the evidence. It is the same evidence as the screen route.

Keep every sheet. Put it all in your wallet. Write W03_Maze on the wallet.

You will open that wallet again in Week 4.

Point, say, draw or write. Someone may record your exact words.

On the screen route this week is saved as W03_Maze.sb3. On the paper route no file is made. Your pages are the record: write your name and the date on every page and put them in your folder. An adult initials the folder. Nobody should ask you for W03_Maze.sb3 if you took the paper route.

Write your code

Maze · Line 1 of the Week 3 reference: "Maze sprite: walls on a transparent costume". Draw your walls on this card. Leave clear gaps. Leave the corridors blank so a counter can sit in them.

Write one block on each line. Start with the hat block, which is done for you.

SPRITE CARD 1 - my sprite name: _____ (write it, trace it, or say it: Maze). No hat block this week.

Blocks you may use this week:

- Week 3 word bank: EMPTY - this week uses no blocks.
- Leave both stack rows empty.
- You may write: no blocks yet.
- Your first block comes in Week 4.

Player · Line 2 of the Week 3 reference: "Player sprite: a small object". Draw one small object on this card. It must be small enough to pass a 60-unit gap.

Write one block on each line. Start with the hat block, which is done for you.

SPRITE CARD 2 - my sprite name: _____ (write it, trace it, or say it: Player). No hat block this week.

Blocks you may use this week:

- Week 3 word bank: EMPTY - this week uses no blocks.
- Leave both stack rows empty.
- You may write: no blocks yet.
- Your first block comes in Week 4.

Finish · Line 3 of the Week 3 reference: "Finish sprite: a clear goal". Draw one clear goal mark on this card. It shows where the route ends.

Write one block on each line. Start with the hat block, which is done for you.

SPRITE CARD 3 - my sprite name: _____ (write it, trace it, or say it: Finish). No hat block this week.

Blocks you may use this week:

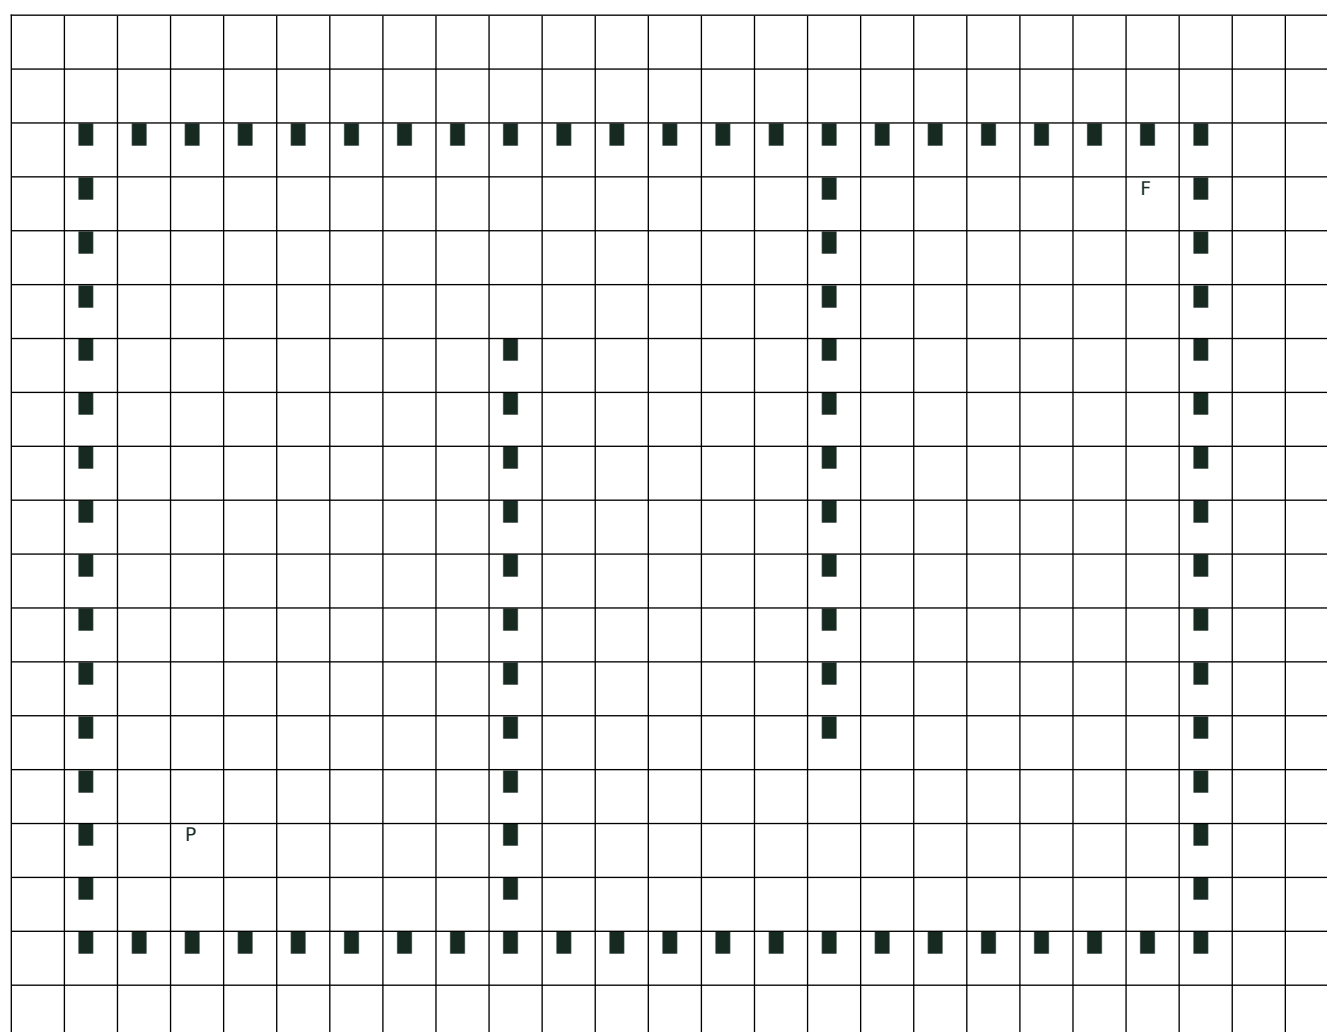

- Week 3 word bank: EMPTY - this week uses no blocks.
- Leave both stack rows empty.

- You may write: no blocks yet.
- Your first block comes in Week 4.

The maze

The printed maze grid is the thing you run your project on. Do not just look at it. Move a counter on it. 1. Put the small Player counter on the start at x -180, y -120. 2. Put the Finish card on x 180, y 120. 3. One move is 10 units. Move the counter one move at a time. 4. After each move, write the new x and y in the trace table. 5. Go up. Then go right through gap 1. Then go down. Then go right through gap 2. Then go up to Finish. 6. Now put the big 80-unit counter in gap 1 at x -60, y 110. It will not fit. Gap 1 has only 60 units of space. 7. Put the small counter back in gap 1. It fits. 8. Last, do the same walk on your own Maze card with your own Player card. If your counter cannot get through your own gap, redraw that gap wider and walk it again.

The maze below is the real one, at its real size. One square is 20 steps. Player starts at (-180, -120). Finish is at (180, 120). Move a counter square by square and write down where it lands.

Predict, trace, compare

Table A. Predict, then test. Which counter fits gap 1? Gap 1 is above the first inner wall. It has 60 units of space.

Counter	How wide it is	Space in gap 1	My prediction: fits / does not fit	What happened when I put it in the gap	Was my prediction right? yes / no
Small Player counter	16 units	60 units			
Large Player counter	80 units	60 units			

Table B. Trace 1. Six moves up from the start. The counter starts at x -180, y -120.

Move	What I do with the counter	x	y
Start	Put the counter on the start	-180	-120
Move 1	Move the counter up 10	-180	-110
Move 2	Move the counter up 10		
Move 3	Move the counter up 10		
Move 4	Move the counter up 10		
Move 5	Move the counter up 10		
Move 6	Move the counter up 10		

Table C. Trace 2. Six moves right, through gap 1. The counter starts at x -80, y 110.

Move	What I do with the counter	x	y	Touching a wall? yes / no
Start	Put the counter on x -80, y 110	-80	110	no
Move 1	Move the counter right	-70	110	no

	10			
Move 2	Move the counter right 10			
Move 3	Move the counter right 10			
Move 4	Move the counter right 10			
Move 5	Move the counter right 10			
Move 6	Move the counter right 10			

Table D. The whole route. Write the x and y at every corner you reach.

Corner	Which way I moved	x	y	Reached it? tick, point or say
Start	Put the counter down	-180	-120	
Corner 1	Up			
Corner 2	Right, through gap 1			
Corner 3	Down			
Corner 4	Right, through gap 2			
Finish	Up			

Table E. The lift test. Sprite or backdrop?

What I lift up	Does it come off the sheet? yes / no	Sprite or backdrop?
My Maze card		
My Player card		
My Finish card		
The plain sheet under the cards		

Table F. Name and select. An adult says a name. I pick out that card.

An adult says this name	The card I picked out	Right card? yes / no	Did I lift it or point to it?
Maze			
Finish			
Player			
Maze			

My completion record

What this week shows

AQA 71638 outcome 1, in the teacher guide's own words: "Observe each pupil creating and selecting all three sprites. Record what they did and the support used. A downloaded finished maze does not establish creation." Lesson goal, in the pack's own words: "I can create a maze, a player and a finish as three sprites." Teacher guide expected answer 1: "The three roles are Maze, Player and Finish. A maze painted only as a backdrop does not meet this outcome."

- ☐ I created and named Maze, Player and Finish. I made all three cards myself. I wrote, traced or said each name.
- ☐ My Maze is a sprite I can select. When an adult says Maze, I pick out the Maze card. My walls come up with the card. The plain sheet stays on the table.
- ☐ Player fits through the gaps. I moved my counter through gap 1 and gap 2 and wrote down where it went. I tried the big counter too. It did not fit.
- ☐ I saved and reopened my project. I put my three cards and my sheets in my wallet. I wrote W03_Maze on the wallet. I closed it, opened it again, and named all three cards.

Adult record

- ☐ Date, pupil name, and the route taken: paper route. Record the route here in this teacher guide.
- ☐ Observed the pupil making three separate cards. Record what they drew on each one.
- ☐ Observed the pupil naming each card. Record the method: written, traced over the model word, or dictated and scribed word for word.
- ☐ Observed the pupil pick out each named card on request. Four asks across three names. Record how many were right first time, and whether the pupil lifted the card or pointed to it.
- ☐ Observed the lift test. The Maze card lifted and the walls came with it. The plain sheet stayed on the table. Record the pupil's answer to "sprite or backdrop".
- ☐ Observed the pupil move a counter from their own start, through both gaps, to Finish, recording the coordinates reached. Copy the pupil's own start coordinates into this guide. Weeks 4, 5 and 6 use them.
- ☐ Observed the pupil compare the 16-unit counter and the 80-unit counter at the 60-unit gap, and give a fits / does not fit answer.
- ☐ Observed the pupil close the W03_Maze wallet, reopen it, and name all three cards again.
- ☐ Record the support used against each of the four pupil checks, exactly as the guide's observation table asks: "Date and support used".
- ☐ Do not sign any statement from a handed-in card set you did not watch being made. The pack's rule holds on paper exactly as on screen: a finished maze does not establish creation.

☐ Complete the AQA summary sheet as published, from this observation. Do not write the route on it. Do not annotate it. Do not reprint it. The route a pupil took is recorded in this teacher guide only.

Adult name: _____ Date: _____

Route taken: paper · Recorded in the teacher guide, not on the AQA form.
