

Plan an outdoor break

Learning intention

Explain why sunlight can harm eyes and choose sensible ways to reduce exposure.

You are choosing protection.

Use evidence, not lens colour.

No one looks at the Sun.

Three light clues

1. Does the Sun give out light?
2. Can water reflect sunlight?
3. Is staring at the Sun a safe test?

Some sunlight is invisible

Schematic categories: not amounts or a full spectrum.

Visible light lets us see. UV is invisible to our eyes. Sunlight can damage eyes.

I read the protection evidence

Lens darkness alone cannot confirm UV protection.

Lens darkness is not enough. I check reliable UV information. I also plan shade and a hat.

Reflection matters as well

Never look at the Sun or stare into its bright reflection.

Sunlight can reflect from surfaces. Combine ways to reduce exposure.

Choose the strongest kit

Compare glasses A and B. Which has useful UV evidence? What else will you add?

Kit card	Stated evidence
A	Dark lenses; UV protection not confirmed
B	Reliable check confirms suitable UV protection and fit
C	Wide-brimmed hat
D	Shaded area available

Constructed teaching evidence

W1. Which plan is supported by the evidence?

Repair the risky message

Message: “Wear sunglasses, then watch the Sun.”

Stop. Rewrite the message.

Keep protection and the no-looking rule.

W2. What must our message always say?

Which is the safest science claim?

Choose the accurate account.

- A** Very dark lenses prove good UV protection.
- B** Sunglasses let us stare at the Sun safely.
- C** Use suitable UV protection, a hat and shade; never look directly at the Sun.

Choose your investigation route

Choose a protection plan.

Write a pupil safety brief.

Make a decision with missing evidence.

Use the evidence

Read or point to one clue.

Record what it supports.

Keep your explanation short.

Make your own science record

Complete your chosen route.

Use a diagram, words or speech.

Check one answer with the evidence.

Check and improve

Does my answer match the evidence?

Have I explained why?

Improve one label or sentence.

Lundy loop: improve our account

Choose how to share one idea.

Listen to another explanation.

Use evidence to improve our account.

Which sentence must stay in every plan?

Three quick checks

E1. Why do we protect our eyes from sunlight?

E2. Name two ways to reduce exposure.

E3. Do ordinary sunglasses make Sun viewing safe?
