Station support two

Thursday 5 November 2026 | 12:50–14:10 | Year A

Set up

Support team B in P5 and P6. Put out role cards, route sheets, approved extracts and pencils. Have the cost cards and a calculator ready for P6. The teacher gives the goal and leads each task. Paper colour is a choice, not a level.

What to do

P5: help pupils compare then and now, choose a focus and plan one object sketch with a caption. Keep an extract code or an unanswered question beside the claim. P6: check the group subtotal, add one transport option, then add ten per cent to that whole total. Divide the final planning total by ten pupil places.

What to look for

Check that all fourteen travellers appear in relevant costs. A shop reserve is money kept available, not money that must be spent. A per-pupil planning figure does not set a family charge. Keep at least one home pupil at each team during appointments and help returners check their own cost line.

What to record

Keep anonymous codes, one observed action or exact scribed line, a coded work or photo reference and actual support. Keep errors and the learner's own correction visible. Do not infer independent work from a team answer.

Prompt and finish

Point; ask a short question; rephrase; offer a frame or choice; model one first step and return the task. No cold calling; allow pass, point or private response. Finish: one team plan, then a checked budget pitch. Only paper research and modelling; no heat or food activity.
