Purpose and success checks

What might my posts show about me?

I can spot a detail that should stay private. I can choose who should see a post. I can give a reason for a safer change.

CAREERS-LAUNCH-A2-W3-E1: An individual review of fictional posts, with a chosen action and reason, one safer rewritten post, audience check, feedback response, actual support and visible gaps. No personal account is inspected.

Before pupils arrive

Print the six fictional cards, evidence sheet and word mat. Use offline paper examples only. Identify the available support adult and safeguarding route. Do not ask learners to search for themselves or classmates, log in, show profiles or reveal private details.

Offer processing time, a quiet start and the usual communication support. Capture each learner’s own work. Read the Staff Answers before teaching.

Forty minute sequence

3	2	Read the diagram; hear one clue or question.
4	0	Read the exact objective and success checks.
5	5	Model the six lines; explain the reason for each.
6	5	Ask for a hinge answer and reason; reteach if needed.
7	12	Use the six cards and the Supported/Independent/Aspire routes.
8	6	Complete the individual two-page evidence record.
9	4	Check ownership, support, response and next step.
10	2	Take a short quiet exit response.
11	0	Use the vocabulary mat throughout.
12	0	Hidden reference for adults.

Hinge and reteach

B. A limited audience reduces exposure but cannot guarantee that a viewer will not copy or share content. A promises too much; C adds an unnecessary private detail. Ask what could be removed before sharing. If needed, model how a paper copy can leave its first audience, then recheck with a fictional group photo. Do not demonstrate on a real account.

Access and practice

Supported: choose one card and explain a step. Independent: review three posts and give reasons. Aspire: compare two safer ways to share work.

Use cards A, D and E as the three core reviews; the other cards extend discussion. Model A, then invite the learner to explain a choice using their own words. Supported learners may review one card; leave unattempted rows blank. Ask for one safer rewrite and an audience check. Give one specific NS+ prompt and retain the learner’s response.

Begin evidence during practice and finish during capture. Accept speech, pointing, drawing, writing or usual AAC. Scribe exact words without supplying the assessed reason. No forced pair work or public performance.

Safe teaching evidence and learner voice

Boundaries

Keep every example fictional and anonymous. Do not collect names, addresses, account handles, passwords or screenshots. Learners may pass on personal disclosure and use a card instead. If a concern arises, listen privately and follow the local safeguarding route; do not investigate it in the group. No account or post is changed in this lesson.

Assessment and feedback

Check the learner links a particular detail to a risk and chooses a proportionate action: keep after checks, edit, or do not share. Accept a supported review of one card and record that the other cards are not yet assessed. The rewritten post must avoid private details and include an audience check. A privacy setting is not proof that copying is impossible. Record the learner's own explanation and revision, not just the adult model.

Retain actual work, response mode and support. Use VF · WS · I · NS+ · // (self-edit) · ? (read back) · R (responded) · E (evidence in the school's evidence record). R requires Voice, Audience, an NS+ prompt and the learner's response in the same colour, on the same page or usual mode. Record E only after evidence is banked. Blank forms and adult models are not completed learner evidence.

Learner voice

Space: calm, accessible participation. Voice: a choice, reason or help request. Audience: the adult listens or reads and replies. Influence: record the support or next-step change made in response.

Offer to the Communication portfolio

Explain a choice, listen to a different view and revise a short message for its audience. The receiving teacher maps authentic responses to their own portfolio; no communication criteria are assigned here.
