

Using digital mapping and GIS

Learning goal: Use digital mapping or GIS to describe a place.

Words to use

Word	Meaning
settlement	A place where people live
urbanisation	Growth in the share of people living in urban places
land use	What land is used for
GIS	Mapping information in separate data layers

Remember

What does a GIS layer do? It displays a selected type of spatial information over a map.

Can building outlines alone establish population density? No. People-per-area data would also be needed.

How to show your learning

Capture or print an annotated map with at least two layers.

With the ____ layer on, I notice _____. This suggests _____. The map cannot show _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
