

Teacher card

Using digital mapping and GIS / LAUNCH_A2_W02

Outcome: Use digital mapping or GIS to describe a place.

Evidence to retain: F: annotated map and independent pattern question.

Forty minute route

Arrival 4 min; starter 3; model 6; shared task 7; check 2; independent 12; review 3; exit 3.
Pause time is flexible.

Preparation

Choose one independent route. Print the evidence and shared cards, required visual or data sheet, route worksheet and exit. The organiser is one separate A4 page. Keep answers with staff.

Use school fieldwork arrangements. No pupil names or photographs of identifiable strangers are needed. Indoor observation is valid when accurately labelled.

Access and regulation

Pre-teach terminology and model evidence use. Chunk sources and data; provide an initial frame, then reduce it. Maintain normal access arrangements. Extend by weighing limitations, alternative explanations and evidence quality. Adults support access and evidence selection without supplying answers.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

Use sensitive content warnings where relevant. Do not ask for family details or personal experiences.

Assessment

Use questioning and the exit response to decide the next step. Record the learner's individual contribution and the access support used.

UAS: no approved unit code is supplied. Match the learner's evidence to the centre-selected unit and exact criteria before submission. This pack makes no automatic award claim.

Model and answers

Read these pages before teaching. Hide the model during independent assessment.

Question: What does a GIS layer do?

Evidence: A Local reference points: The Middlesbrough railway station and the Transporter Bridge are reference points on our digital map. Toggle layers to examine their positions. Town Hall lies beyond this map's southern boundary.

Think aloud: It displays a selected type of spatial information over a map.

Check: Can building outlines alone establish population density? No. People-per-area data would also be needed.

Arrival answers

1. A whole grid square.
2. A place where people live
3. It displays a selected type of spatial information over a map.
4. No. People-per-area data would also be needed.

Shared activity reasoning

Exit responses

What does a GIS layer do? It displays a selected type of spatial information over a map.

Can building outlines alone establish population density? No. People-per-area data would also be needed.

Teaching and evidence record

Supplied scheme of work teaching sequence: Model one layer; locate features, describe a pattern and capture/annotate map evidence.

Look for

F: annotated map and independent pattern question.

Accept accurate equivalents, including speech or exact scribing. Check the concept and use of evidence rather than length or handwriting. Record access support separately from content prompting.

BUILD: a concrete example with a reason or demonstrated action. GROW: explain or compare with a relevant detail. LAUNCH: connect evidence and reasoning; use a limitation when the outcome requires it. Keep RE responses non-GCSE.

Media

Original captioned teaching model made for this pack. It demonstrates the supplied reasoning; it is not historical footage, survivor testimony or a documentary. The full transcript and factual source credits are included.

Use manual steps for a calm pace. The silent MP4 has visible captions and a matching text transcript. External archive media is optional and should be previewed before class.
