

Teacher card

Writing up a fieldwork enquiry / LAUNCH_A2_W07

Outcome: Complete a fieldwork enquiry write up.

Evidence to retain: S: enquiry process, map/data accuracy and conclusion.

Forty minute route

Arrival 4 min; starter 3; model 6; shared task 7; check 2; independent 12; review 3; exit 3.
Pause time is flexible.

Preparation

Choose one independent route. Print the evidence and shared cards, required visual or data sheet, route worksheet and exit. The organiser is one separate A4 page. Keep answers with staff.

Use school fieldwork arrangements. No pupil names or photographs of identifiable strangers are needed. Indoor observation is valid when accurately labelled.

Access and regulation

Pre-teach terminology and model evidence use. Chunk sources and data; provide an initial frame, then reduce it. Maintain normal access arrangements. Extend by weighing limitations, alternative explanations and evidence quality. Adults support access and evidence selection without supplying answers.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

Use sensitive content warnings where relevant. Do not ask for family details or personal experiences.

Assessment

Use a different example for shared practice. During independent assessment, keep the agreed reader, scribe, glossary or response mode, but withdraw answer models and record prompts separately.

UAS: no approved unit code is supplied. Match the learner's evidence to the centre-selected unit and exact criteria before submission. This pack makes no automatic award claim.

Model and answers

Read these pages before teaching. Hide the model during independent assessment.

Question: Check a fieldwork conclusion against the evidence.

Evidence: Read the assessment requirement: S: enquiry process, map/data accuracy and conclusion.

Think aloud: My conclusion must use my actual counts and enquiry question. I state the sampled location and time so I do not generalise to a whole town.

Check: Why include a limitation? It shows the boundaries of what the method and sample can establish.

Arrival answers

1. It reduces misleading differences caused by showing unequal areas or detail.
2. A place where people live
3. The enquiry question and actual collected data.
4. It shows the boundaries of what the method and sample can establish.

Shared activity reasoning

Exit responses

What should the conclusion refer to? The enquiry question and actual collected data.

Why include a limitation? It shows the boundaries of what the method and sample can establish.

Teaching and evidence record

Supplied scheme of work teaching sequence: Combine question, method, map/data and conclusion; judge what the evidence supports and one method limitation.

Look for

S: enquiry process, map/data accuracy and conclusion.

Accept accurate equivalents, including speech or exact scribing. Check the concept and use of evidence rather than length or handwriting. Record access support separately from content prompting.

BUILD: a concrete example with a reason or demonstrated action. GROW: explain or compare with a relevant detail. LAUNCH: connect evidence and reasoning; use a limitation when the outcome requires it. Keep RE responses non-GCSE.

Media

Original captioned teaching model made for this pack. It demonstrates the supplied reasoning; it is not historical footage, survivor testimony or a documentary. The full transcript and factual source credits are included.

Use manual steps for a calm pace. The silent MP4 has visible captions and a matching text transcript. External archive media is optional and should be previewed before class.
