

Mapping climate zones and hazards

Learning goal: Use atlases and maps to locate climate zones and hazards.

Words to use

Word	Meaning
climate	Weather patterns over a long period
hazard	A process or event with potential to cause harm
effect	A consequence
response	An action taken because of a situation

Remember

Are earthquakes caused by being in a warm climate zone? No. They are mainly related to tectonic processes.

What helps explain broad temperature patterns? Latitude, with other influences such as altitude.

How to show your learning

Use the atlas and map to locate a tropical, temperate and polar example.

The ____ zone lies _____. Earthquakes are linked mainly to _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
