

Arrival choices

You can begin without previous learning. Word help: climate means weather patterns over a long period.

Start with 1 and 2. Try 3 and 4 when ready. Reading and exact scribing are available.

1 What does climate mean?

Support: Use the reminder strip or talk it through with an adult.

My response

2 Which meaning fits climate?

Support: Choose: Weather patterns over a long period OR A process or event with potential to cause harm.

My response

3 Are earthquakes caused by being in a warm climate zone?

Support: Use the model evidence anchor A or read one relevant card together.

My response

4 What helps explain broad temperature patterns?

Support: Give a reason when ready.

My response

Stretch: use a precise example or explain which detail supports your answer.

Evidence cards

Read, point or listen. Keep the source label with any detail you use.

A Zones and events

Broad temperature zones relate to latitude. Near the equator is generally warmer; high latitudes are generally colder. Local climate also depends on altitude and other factors. Earthquakes relate mainly to plate boundaries, not climate zones.

Source: Authored map explanation

Limit: Broad bands simplify climate; they are not a detailed climate classification.

B Human influence

Burning fossil fuels adds carbon dioxide. Greenhouse gases slow heat loss to space. Human activity is the main cause of recent global warming.

Source: NASA Causes of climate change

Limit: One local hot or cold day does not establish the global trend.

C Two responses

Reducing fossil-fuel use tackles a cause of warming. Shade, water access and cooler buildings can reduce harm during heat. These responses do different jobs.

Source: Authored examples based on climate mechanisms

Limit: Their suitability depends on the place and the needs of people there.

D Community accounts

Fictional account 1: a faith group explains caring for creation as its reason for planting shade trees.

Fictional account 2: a non-religious residents' group gives human wellbeing as its reason for a cool-room project.

Source: Two authored teaching accounts with explicitly stated values

Limit: These are not reports of real organisations and do not represent every religious or non-religious person.

Visual resource

Use this visual with the evidence cards and enquiry questions.

Source: Natural Earth public-domain outlines, labels simplified. Terms of use:
<https://www.naturalearthdata.com/about/terms-of-use/> (recorded in Sources and checks).

A detail I noticed and what it helps me explain

Shared investigation

1. Toggle broad temperature bands and earthquake locations.

2. Discuss why the two patterns need different explanations.

Work with a partner or adult, or use your own table. One person suggests; the other checks the evidence. Swap after one turn. Passing is allowed.

Use the evidence cards and any visual sheet. Follow the two shared steps above, then record one decision.

Our explanation

Support: Read one evidence card together. Highlight a useful detail. Rehearse with: The ____ zone lies _____. Earthquakes are linked mainly to _____.

Further challenge: Explain one limit of the broad climate-zone bands.

Supported independent task

Complete this route only. Use atlases and maps to locate climate zones and hazards.

1. Use the atlas and map to locate a tropical, temperate and polar example.
2. Locate Japan and an earthquake example.
3. Answer an independent pattern question using latitude and the key.

Support: Read one evidence card together. Highlight a useful detail. Rehearse with: The ____ zone lies _____. Earthquakes are linked mainly to _____. Complete the organiser one space at a time. The ____ zone lies _____. Earthquakes are linked mainly to _____.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

An adult may read or scribe your exact response. They should not choose the answer.

Standard independent task

Complete this route only. Use atlases and maps to locate climate zones and hazards.

1. Use the atlas and map to locate a tropical, temperate and polar example.
2. Locate Japan and an earthquake example.
3. Answer an independent pattern question using latitude and the key.

Support: The ____ zone lies _____. Earthquakes are linked mainly to _____.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

Check the required evidence and revise one detail.

Stretch independent task

Complete this route only. Use atlases and maps to locate climate zones and hazards.

1. Use the atlas and map to locate a tropical, temperate and polar example.
2. Locate Japan and an earthquake example.
3. Answer an independent pattern question using latitude and the key.
4. Explain one limit of the broad climate-zone bands.

Support: Choose the evidence independently. Use the frame only if it helps.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

Explain one limit of the broad climate-zone bands.

Exit ticket

Choose a response mode. You may give your answers privately to an adult.

Are earthquakes caused by being in a warm climate zone?

My response

What helps explain broad temperature patterns?

My response

Support: The ____ zone lies _____. Earthquakes are linked mainly to _____.

Further challenge: Explain one limit of the broad climate-zone bands.

One thing I changed or want to check
