

How a hazard affects a place

Learning goal: Describe how a natural hazard affects people and places.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

What hazard followed seafloor displacement? A tsunami.

Does magnitude directly count people affected? No. Exposure and vulnerability also matter.

How to show your learning

Create a case-study diagram for Japan.

The cause was _____. An effect was _____. A response could reduce _____ by _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
