

Climate change causes and effects

Learning goal: Investigate causes and effects of climate change.

Words to use

Word	Meaning
climate	Weather patterns over a long period
hazard	A process or event with potential to cause harm
effect	A consequence
response	An action taken because of a situation

Remember

What happens when fossil fuels are burned? Carbon dioxide is added to the atmosphere, strengthening the warming influence.

How do emissions reduction and shade differ? The first tackles a cause; shade can reduce exposure to heat.

How to show your learning

Describe a pattern in the supplied climate data.

From ___ to ___, the data ___. Burning ___ adds ___. One response is ___.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
