

Presenting maps and data

Learning goal: Present geographical findings with maps and data.

Words to use

Word	Meaning
climate	Weather patterns over a long period
hazard	A process or event with potential to cause harm
effect	A consequence
response	An action taken because of a situation

Remember

Why include a data value in a pattern statement? It supports the description with checkable evidence.

What must a useful graph label include? The variable, units and relevant dates or categories.

How to show your learning

Present three geographical findings using a map and data display.

The map locates _____. The data show _____ at _____. This suggests _____, with the limit _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
