

Teacher card

Geography and worldviews assessment / GROW_S2_W06

Outcome: Complete a Geography and worldviews assessment and map-skills check and bank UAS evidence.

Evidence to retain: S: half-term review, relevant map/source skill check and UAS evidence.

Forty minute route

Arrival 4 min; starter 3; model 6; shared task 7; check 2; independent 12; review 3; exit 3.
Pause time is flexible.

Preparation

Choose one independent route. Print the evidence and shared cards, required visual or data sheet, route worksheet and exit. The organiser is one separate A4 page. Keep answers with staff.

Use evidence to explain problems and feasible responses. Avoid asking pupils to carry responsibility for solving global climate change.

Access and regulation

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

Use sensitive content warnings where relevant. Do not ask for family details or personal experiences.

Assessment

Use a different example for shared practice. During independent assessment, keep the agreed reader, scribe, glossary or response mode, but withdraw answer models and record prompts separately.

UAS: no approved unit code is supplied. Match the learner's evidence to the centre-selected unit and exact criteria before submission. This pack makes no automatic award claim.

Model and answers

Read these pages before teaching. Hide the model during independent assessment.

Question: What three kinds of evidence does this assessment combine?

Evidence: Read the assessment requirement: S: half-term review, relevant map/source skill check and UAS evidence.

Think aloud: Map skills, a climate or hazard explanation and a comparison of community responses.

Check: Why should the source type be named? It distinguishes measured data, an explanatory source and a fictional teaching account.

Arrival answers

1. It supports the description with checkable evidence.
2. Weather patterns over a long period
3. Map skills, a climate or hazard explanation and a comparison of community responses.
4. It distinguishes measured data, an explanatory source and a fictional teaching account.

Shared activity reasoning

Exit responses

What three kinds of evidence does this assessment combine? Map skills, a climate or hazard explanation and a comparison of community responses.

Why should the source type be named? It distinguishes measured data, an explanatory source and a fictional teaching account.

Teaching and evidence record

Supplied scheme of work teaching sequence: Combine an independent map task with a short explanation of climate/hazard evidence and a comparison of community responses. Review against unit criteria and select labelled UAS evidence.

Look for

S: half-term review, relevant map/source skill check and UAS evidence.

Accept accurate equivalents, including speech or exact scribing. Check the concept and use of evidence rather than length or handwriting. Record access support separately from content prompting.

BUILD: a concrete example with a reason or demonstrated action. GROW: explain or compare with a relevant detail. LAUNCH: connect evidence and reasoning; use a limitation when the outcome requires it. Keep RE responses non-GCSE.

Media

Original captioned teaching model made for this pack. It demonstrates the supplied reasoning; it is not historical footage, survivor testimony or a documentary. The full transcript and factual source credits are included.

Use manual steps for a calm pace. The silent MP4 has visible captions and a matching text transcript. External archive media is optional and should be previewed before class.
