

Causes of tectonic hazards

Learning goal: Explain causes of tectonic hazards.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

What caused the 2011 tsunami? Sudden seafloor displacement during the earthquake moved the water above it.

Is magnitude the same as risk? No. Exposure and vulnerability also influence potential harm.

How to show your learning

Build an evidence-based cause, effects and responses diagram.

At the boundary _____. Sudden movement _____. This caused _____. Risk also depends on _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
