

Extreme weather and unequal risk

Learning goal: Investigate extreme-weather hazards and risk.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

What was recorded at Coningsby on 19 July 2022? 40.3 degrees Celsius in the Met Office case-study report.

Why can the same heatwave create unequal risk? People have different exposure, buildings, resources and access to cool spaces.

How to show your learning

Explain the heatwave's effects using the case evidence.

The event was _____. Exposure includes _____. Vulnerability includes _____. The response reduces _____ by _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
