

A hazard case-study report

Learning goal: Complete a hazard case-study report.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

What makes the report more than a description of the event? It explains risk, evaluates management and justifies a judgement with evidence.

What must accompany the graph or map? A title, source, relevant date, labels or key, and an explanation of what it contributes.

How to show your learning

Produce an independent case-study report for Japan 2011 or the July 2022 heatwave.

Location _____. Cause _____. Effects _____. Exposure and vulnerability _____. Management judgement _____. Evidence limit _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
