Teacher and cover guide

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026 · 40 minutes

Learn and keep your part

I can learn a four-beat part and repeat it with a steady pulse.

Learn and rehearse an original class part. This is practice evidence for taking part, not a claim that the award or a public performance is complete.

Success: I can follow the count-in and start on beat 1. I can keep each rest as long as a tap. I can repeat my part twice without speeding up.

Timed flow

Minutes	Stage	Teacher action
0–5	Arrival	Teach the soft tap and stop cue; retrieve four equal beats; choose an access mode.
5–8	Starter	Read A and B. All choose the part with one rest and explain using the numbered boxes.
8–14	I do	Model the four-stage demonstration, score and words; use the check for understanding.
14–18	We do	Count in and play A twice with a visible pointer; fade adult speaking.
18–22	We do 2	Use hinge A. Re-model if needed, then use the parallel hinge and retry.
22–34	Independent	Choose one route; rotate player, pulse keeper and listener; respond to one NS and replay.
34–37	Review	Read back each personal record and keep the score, actual support and response.
37–40	Exit	Each pupil identifies the rest and start, then describes one real practice change.

Learning and evidence

Observe each pupil reading or showing a part, waiting for the count-in, keeping the rest and repeating. Note the actual support and pupil response to one next step. Keep a short pupil-authored practice record and a score or description. This supports practice within the award; it does not certify a whole part.

Give one next step. Respond in the same colour, on the same page or usual mode. Record R only after Voice and Audience are present, one NS is set, and the pupil responds.

Kit and room set up

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

Quantities support five learners plus an adult model.

Item	Quantity
Four-beat score and word mat	5 individual sets; 1 large model
TAP / REST / WAIT / STOP cards	5 sets and one adult set
Quiet tapping surface	5 stable spaces; no loud objects required
Activity and route cards	5 single chosen route cards
Pencils and plain book space	6 pencils; individual books
Evidence slips and existing arts log	5 blank practice records
Response and turn cards	5 sets for player / pulse keeper / listener
Quiet response option	1 calm space; silent pointing available

Before the lesson

Set out part A with beat numbers 1–4 and a clear repeat boundary. Agree the low volume and the red STOP signal. Check each pupil can see the count-in and can choose a comfortable action. Arrange a pair and a trio with predictable turns. Keep personal code fields blank. The adult model stays labelled class example. No track, recording or named artist is needed.

Save and tidy

During minutes 34–37, keep each pupil’s actual practice note with the chosen score, read back any scribed words, and return cards. Record support used and one next step. Collect no personal disclosure. Put selected evidence in the existing arts log; record the real date only after teaching.

Access and group care

You can tap softly, point, sign, speak, draw or write. Ask for a pause or a quiet space. Follow the stop cue. Agree a quiet volume and a clear stop signal. Offer silent beat tracking. Do not require personal disclosure, recording or a public performance.

Demonstration and planned support

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

The demonstration is an original teaching model. It is not a pupil record.

0–15 seconds Read

Point across the four numbered boxes of part A: TAP REST TAP TAP. Say each word at an even pace. Explain that the four beats repeat as one short part.

15–30 seconds Count

Show the blue COUNT-IN card. Count 1, 2, 3, 4 at a calm even pace while the other hand waits. Say: “I start on the next 1, after the count-in.”

30–45 seconds Play

Play two cycles: TAP REST TAP TAP | TAP REST TAP TAP. Keep a small silent movement on every rest. Point to beat 1 at the repeat. Do not compress the silence.

45–60 seconds Check

Ask the listener which rest stayed in time. Model: “My rest was short. I will point to box 2 for a full beat.” Play one more cycle and show how the comment changed the next attempt.

Planned adaptations

Cognition: Teach one four-beat chunk. Model, practise together, then fade voice and pointing while keeping the score visible.

Communication: Pair words with TAP, REST, WAIT and STOP symbols. Allow processing time, signs, pointing and checked scribing.

Semh: Agree turns and a quiet stop cue. Offer a trusted partner, silent role, pause and return. No forced solo.

Sensory: Use soft taps or silent directing from a stable position. Avoid painful actions or loud objects. Offer a quiet space.

Eal: Model terms with actions. Plan in any language. Check meaning through a demonstration or confirmed choice.

Five-a-day: Explicit model; count-check-retry strategy; numbered-box scaffold; flexible pair/trio; static visual teaching aid.

Speaking frames: My part is ___ on beats ___. I kept the rest by ___. The listener noticed ___.

Check and respond

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

Common mistake	What to do
A rest is skipped and the next tap arrives early	Keep all four beat positions visible. Count 1–2–3–4 evenly while silently moving on beat 2. Replay slowly, then fade the adult count.
The pupil starts during the count-in	Use WAIT then START. Rehearse the count-in without playing; move the pointer to beat 1 only after the fourth count.
Repeating means going faster	Show the boundary after beat 4. Keep the next beat 1 the same distance away. Use eight steady silent pulses and let the pupil add the part.

Checks and decision

Cfu: question: Part A is TAP REST TAP TAP. What happens on beat 2, and how long does it last?; answer: No sound for one full beat; point or move silently while counting.; decision: If every pupil can show this, fade spoken counting. If anyone compresses the rest, model one full silent beat, practise together, then check individually.

Hinge: question: Part A repeats. After beat 4, which action comes on the next equal beat? A: TAP on the new 1. B: Wait an extra beat. C: Start faster.; answer: A: TAP on the new 1. The repeat has the same pulse.; decision: All choose at once. If all identify A and demonstrate the boundary, move to independent work. Otherwise count eight equal beats with pointing, add the score, then check the parallel question.

Parallel hinge: question: Part C is TAP TAP REST TAP. After its beat 4, what comes next when C repeats?; answer: TAP on the next beat 1, at the same pace. The rest remains on beat 3.; decision: Ask each pupil to show the boundary. Keep the visible pulse support for anyone who needs it; log the actual help.

Questions with thinking time

F: Point to the silent box.

M: Why must we count through the rest?

H: How would you show that two repeats kept the same pulse?

Evidence and response

How did you keep the rest in time when you repeated your part?

A_Take_Part.pdf · page 1 · Week 2 practice record. Give one next step. Respond in the same colour, on the same page or usual mode. Record R only after Voice and Audience are present, one NS is set, and the pupil responds.
