Stem-cell decisions

Today I can… I can name a possible benefit and risk. I can ask for evidence that tests a claim. I can justify further research without claiming a cure.

Knowledge organiser

I am learning to weigh a possible benefit and risk of stem-cell research using evidence.

Fictional proposal: weigh a possible benefit and risk against evidence. Simplified decision aid; no medical decision is made here.

Word	Meaning
stem cell	a cell that can divide and form specialised cell types
benefit	a possible helpful result
risk	a possible harmful result or uncertain effect
evidence	information that tests or supports a claim

Possible use is not proven treatment. Ask for evidence of both benefit and harm. Further research and routine treatment are different decisions.

You may pass on a personal example. This is a fictional classroom case.
