TA brief · access and source checks

Agree who supports each learner. Swap roles across the week. Hear each learner’s first response. Point, sign, speak, draw, type or write. You may pass or pause. An adult can read or scribe your exact words. Plan in any language.

Use large source cards and a clear desk. Keep the question and source beside the task. Let the pupil point to the line before asking for a full explanation.

Least prompt first: wait; point to the source; ask one short question; rephrase; model a different example, then return the task. Record deepest prompt separately from independence.

I do: name the source and the claim. We do: ask which line supports it. Independent: help access the card while keeping the learner’s science decision.

No cold calling, forced public reading or disclosure. Agree a private pause and re-entry at the last completed step. No evidence collection during distress.

Use fictional cases. Do not ask for family details or predict a person’s future. Inheritance and infection precautions are separate matters.

Use prepared cards and fictional cases. No biological samples, family history or diagnosis. Staff check local risk assessment and internet access.

TA brief · feedback and handover

Keep the first answer. The adult names back the pupil’s meaning. The pupil chooses a real edit or explains why to keep it.

Use VF, WS, I, NS(+), E, R, // and ? only when they occur. R requires the real response loop; a click or completed sheet alone is not enough.

Record valid spoken, written or directed evidence under SCI-LAUNCH-A2-W06 on [SYS]. Keep each learner’s own claim, source, limit, actual feedback and next response.

Handover: checked criteria, misconception, prompt depth, independence, valid mode, adaptation and reason, next example. Follow the learner’s own plan and targets.

If behind, shorten secure rehearsal. Preserve each learner’s sourced explanation and exit. Record any coverage moved. Week 7 reviews autumn science.

Timing: Arrival 5 min; Starter 3 min; I do 5 min; We do 7 min; We do 2 5 min; Independent 8 min; Review 4 min; Exit 3 min. Total 40 minutes. Alternate route views share the same stage time.
