Knowledge organiser

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

Show current understanding of the taught Autumn 2 content, then choose a precise next learning step.

Copy DNA before mitosis. Each daughter cell retains the chromosome set.

Stem cell evidence needs benefits, risks and uncertainty.

A gene is a section of DNA. DNA has complementary base pairs: A with T, and C with G.

A genetic cross predicts a chance for each fertilisation.

Reference for teaching or later review. Do not issue this organiser during the independent checkpoint.
