**Humanities · LAUNCH · Autumn 2 · Week 6 · HUM-LAUNCH-A2-W06**

## Knowledge organiser

Compare the local area with a contrasting place using online evidence.

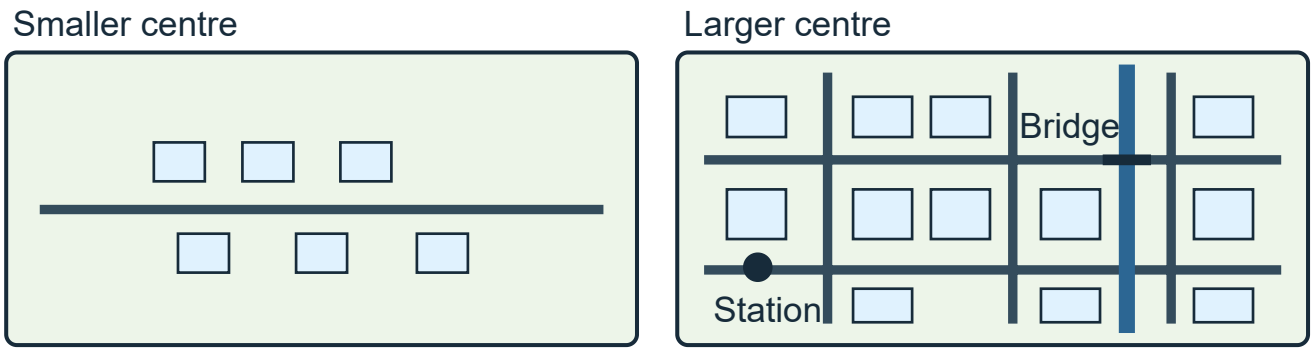

Comparable scales reduce misleading differences in detail or the size of the area shown. Describe the sampled area and qualify the claim.

| Tier | Word | Meaning |
|---|---|---|
| Tier 2 | settlement | A place where people live |
| Tier 2 | urbanisation | Growth in the share of people living in urban places |
| Tier 2 | land use | What land is used for |
| Tier 2 | GIS | Mapping information in separate data layers |

At a similar scale, sample A shows ____ while sample B shows ____. My evidence is ____. The limit is ____.

Made by Matt

## Comparable map samples

Two schematic views at the same scale. The smaller centre has a few buildings along one road and open land. The larger centre has more streets and buildings, a station and a bridge.

The two schematic views support practice. Use the class's comparable map evidence for the enquiry.

Made by Matt

# Evidence cards A and B

## A · Local reference points

The main railway station and the local bridge are reference points on our digital map. Toggle layers to examine their positions. the civic building lies beyond this map’s southern boundary.

These points alone cannot show population density or prove why development happened.

## B · Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

A reason is a hypothesis until tested against evidence for a particular place.

Made by Matt

# Evidence cards C and D

## C · Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your labelled observations for the fieldwork enquiry.

This example does not describe every person or place.

## D · Contrasting reference place

Compare a small centre such as the smaller centre with the larger centre at comparable map scales. Record the area, source and observation round.

One sampled street does not represent a whole settlement.

Made by Matt

**Humanities · LAUNCH · Autumn 2 · Week 6 · HUM-LAUNCH-A2-W06**

## Shared investigation

Compare the local area and the smaller centre at similar map scales. Check creator, coverage and source details and the question each source can answer. Take a turn to suggest a match, then check the evidence.

1. What can you compare at a similar scale?
2. How can different coverage mislead?
3. What should each contrast include?

| Evidence or step | Check |
| --- | --- |
| What can you compare at a similar scale? | Add your answer or card clue. |
| How can different coverage mislead? | Add your answer or card clue. |
| What should each contrast include? | Add your answer or card clue. |

Our explanation

---

## Optional · respond to feedback together

Optional: show one contrast and source detail to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

My response or improvement

---

## We do decision checkpoint

One map shows a whole centre. The other shows one street. What should you do?

1. Compare equivalent areas at a similar scale
2. Count all features and compare directly
3. Assume the smaller map is less developed

My claim and clue

---

Made by Matt

**Worked model**

## Ask the question

Comparable scales reduce misleading differences in detail or the size of the area shown. Use card D. Card D asks us to compare a smaller centre and a larger centre at comparable scales.

## Find the evidence

Card D asks us to compare a smaller centre and a larger centre at comparable scales. A difference in map detail can come from the scale. Check the source and coverage before calling it a real contrast.

## Explain the link

Name each sampled area, compare like features, and record the source, observation round and scale. At a similar scale, sample A shows ____ while sample B shows ____. My evidence is ____. The limit is ____.

## Check what we know

Describe the sampled area and qualify the claim. One sampled street gives evidence about the sample. It cannot establish a whole-settlement pattern on its own.

## You do · Choice

Staff mark I · S · C beside the task.

1. Choose to point, speak, sign, draw or write. Keep your response in your book.
2. Support two contrasts with comparable evidence.
3. Evaluate one source’s usefulness and a limitation, recording source details and scale.

Word bank: settlement · urbanisation · land use · GIS.

My example and card detail

---

My reason and check

---

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

## Review and exit · Choice

Point, draw, sign or tell an adult. Why compare maps at similar scales?

---

Can one street represent a whole town?

---

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.
