Knowledge organiser

Complete a fieldwork enquiry write up.

Use your actual counts and the enquiry question. Name the sampled area and observation round. It explains what the method and sample can establish and where the claim stops.

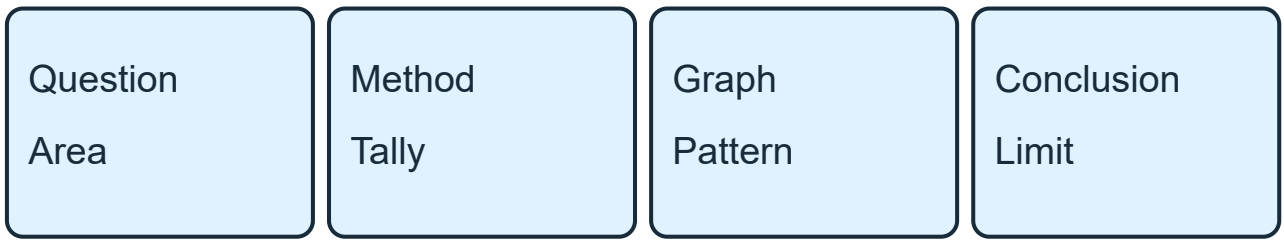

Tier	Word	Meaning
Tier 2	settlement	A place where people live
Tier 2	urbanisation	Growth in the share of people living in urban places
Tier 2	land use	What land is used for
Tier 2	GIS	Mapping information in separate data layers

My question was ____. My data show ____. This supports ____. The limit is ____.

Fieldwork report sequence

Four boxes showing question and area, method and tally, graph and pattern, then conclusion and limit.

Use the report sequence to assemble your own evidence. Keep practice and actual counts separate.

Made by Matt

Evidence cards A and B

A · Local reference points

The main railway station and the local bridge are reference points on our digital map. Toggle layers to examine their positions. the civic building lies beyond this map’s southern boundary.

These points alone cannot show population density or prove why development happened.

B · Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

A reason is a hypothesis until tested against evidence for a particular place.

Made by Matt

Evidence cards C and D

C · Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your labelled observations for the fieldwork enquiry.

This example does not describe every person or place.

D · Contrasting reference place

Compare a small centre such as the smaller centre with the larger centre at comparable map scales. Record the area, source and observation round.

One sampled street does not represent a whole settlement.

Humanities · LAUNCH · Autumn 2 · Week 7 · HUM-LAUNCH-A2-W07

Shared investigation

Review a sample conclusion against its data. Check that the report answers the original enquiry. Take a turn to suggest a match, then check the evidence.

1. Where does the method go?
2. What must the graph and tally agree on?
3. What should the conclusion do?

Evidence or step	Check
Where does the method go?	Add your answer or card clue.
What must the graph and tally agree on?	Add your answer or card clue.
What should the conclusion do?	Add your answer or card clue.

Our explanation

Optional · respond to feedback together

Optional: show one conclusion and actual evidence to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

My response or improvement

We do decision checkpoint

Your conclusion describes the whole town from one sampled street. What should you do?

1. Limit the claim to the sampled street
2. Keep the claim without a limit
3. Replace the tally with fictional data

My claim and clue

Made by Matt

Worked model

Ask the question

Use your actual counts and the enquiry question. Name the sampled area and observation round. Use card C. Card C gives fictional practice counts. Your report must use your own actual tally for the enquiry conclusion.

Find the evidence

Card C gives fictional practice counts. Your report must use your own actual tally for the enquiry conclusion. A strong conclusion answers the question with a precise pattern from the evidence, then explains the limits of the sample.

Explain the link

Put the question, location, method, actual data, graph and conclusion together. Keep your own contribution clear. My question was ____. My data show ____. This supports ____. The limit is ____.

Check what we know

It explains what the method and sample can establish and where the claim stops. One observation area or round cannot establish how the whole settlement changes.

You do · Choice

Staff mark I · S · C beside the task.

1. Choose to point, speak, sign, draw or write. Keep your response in your book.
2. Explain what the evidence supports.
3. Evaluate one method limitation and retain your individual contribution.

Word bank: settlement · urbanisation · land use · GIS.

My example and card detail

My reason and check

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Catch-up · absence or access only

For absence or access only.

Use card C with an adult. Card C gives fictional practice counts. Your report must use your own actual tally for the enquiry conclusion. Join the task with one clue.
