Pupil studio resources & worksheet — Makers, tools and visual links

Pathway: BASE · Week 2 Part 2 · Big question: How do makers use layered card shapes to build bold relief art?

Arrival check

Touch the sample card board on your table. How does it feel?

[ ] Raised and bumpy in parts

[ ] Flat like thin note paper

[ ] Wet like water

Starter visual cues

Layer 1 is the flat back board.

Layer 2 has wide card tall bars glued down.

Layer 3 has thin cross bars glued on top.

Side light makes real shadows under each edge.

Vote: What happens when you glue one card strip on top of another strip?

Studio practice planner

Choose your base shape, top texture, and detail for your relief board.

Shapes/Focus: Twin tall towers, Single wide arch, Criss-cross bridge, Stepped frame

Tools/Methods: Smooth card strips, Ridged card strips, Punched bolt dots, Charcoal edge rub

Exit ticket

What do we call flat artwork where raised shapes stick up from the base?

[ ] Relief

[ ] Water wash

[ ] Pencil grid
