Tier pack: Supported route — Makers, tools and visual links

Pathway: BASE · Week 2 Part 2 · Big question: How do makers use layered card shapes to build bold relief art?

Supported route studio steps

Step 1: Pick a stiff base board. Four pre-cut card beams.

Step 2: Arrange your beams into a bridge or tower shape. First gluing.

Step 3: Spread a thin layer of glue. Press the two main beams down.

Step 4: Glue two ridged strips across the top to make a raised layer.

Success check

Two layers of card strips glued firmly into a frame.

Key words helper

• relief: Art where raised shapes stick up from a flat base.

• layer: One piece of card glued on top of another piece.

• base: The flat stiff board at the bottom of your work.

Review checklist

[ ] Hold your board near the window or lamp so light hits the side.

[ ] Point to a real shadow made by your top card layer.

[ ] Check that all card corners are stuck down flat.
