Pupil studio resources & worksheet — Try it once, then say what happened

Pathway: BASE · Week 4 Part 1 · Big question: What happens when we test sponge tapping and wax resist on our sign?

Arrival check

Look at the white wax crayon on your tray. Can you see white wax on white card. First you paint?

[ ] It is hard to see until dark ink goes over it

[ ] It glows bright neon green

[ ] It turns the card into wood

Starter visual cues

Box A: Dab a sponge straight up. Down over a cut shape.

Do not scrub the sponge side to side.

Box B: Draw firmly with white wax crayon first.

Brush thin dark blue ink across the wax. Watch the lines shine.

Vote: Why do we dab a paint sponge straight up and down instead of scrubbing side to side?

Studio practice planner

Pick your test tool, colour pair, and log note for today.

Shapes/Focus: Cut shape star edge, Cut shape shield frame, Wax wave lines, Wax leaf veins

Tools/Methods: Up-and-down sponge dab, Two-tone sponge blend, White wax under blue ink, Amber wax under black ink

Exit ticket

Why does wet water ink roll off a wax crayon mark?

[ ] Wax is oily and dry so it pushes water away

[ ] Wax is hotter than ink

[ ] The brush jumps over the line
