Tier pack: Independent route — Resolve and finish the relief artwork

Pathway: BASE · Week 6 Part 2 · Big question: How do we add top details and a neat border to finish our relief panel?

Independent route studio steps

Step 1: Add final Layer 3 cross-bracing strips. Corner bolt dot plates.

Step 2: Skim warm rust or copper dry-brush first. Then catch the highest points with bright chrome.

Step 3: Draw a sharp white chalk line along the top edge of your main arch or beam.

Step 4: Mount your finished panel middlely onto a backing card frame.

Success check

Three-layer relief panel fully resolved with two-tone shiny metal finish. Frame.

Key words helper

• resolve: To finish all last details so the artwork feels full.

• bright line: Bright chrome or white marks on the highest raised edges.

• bolt dot: A small round bolt dot glued on a beam corner.

• frame: A clean border card behind your panel that makes it look sharp.

• full: All layers stuck firm and ready for the wall.

Review checklist

[ ] Give your panel a gentle tilt test to make sure no pieces are loose.

[ ] Point to the brightest bright line on your finished frame.

[ ] Place your framed panel safely on the art show shelf.
