Tier pack: Supported route — Resolve and finish the relief artwork

Pathway: BASE · Week 6 Part 2 · Big question: How do we add top details and a neat border to finish our relief panel?

Supported route studio steps

Step 1: Glue four pre-punched card bolt dots onto the corners of your beams.

Step 2: Sweep a dry chrome brush lightly across your raised card. Bolt dots.

Step 3: Line your panel up with the four guide marks on your backing frame. Press down.

Step 4: Write your first name neatly on the back sticker.

Success check

Bolt dots added, chrome bright lines skimmed,. Panel mounted straight.

Key words helper

• resolve: To finish all last details so the artwork feels full.

• bright line: Bright chrome or white marks on the highest raised edges.

• bolt dot: A small round bolt dot glued on a beam corner.

Review checklist

[ ] Give your panel a gentle tilt test to make sure no pieces are loose.

[ ] Point to the brightest bright line on your finished frame.

[ ] Place your framed panel safely on the art show shelf.
