Teacher and cover plan — Curate the studio showcase

Pathway: BASE · Week 7 Part 2 · Big question: How do we arrange and label our relief panels for a class art show?

Learning goals and studio kit

• Write a neat art wall label card with your title. Art tools.

• Help arrange the finished relief panels in a straight row on the display board.

• Walk the art show. Leave one kind sticky note for a friend.

Studio kit: Finished Week 6 framed relief panels, printed art wall label cards, black pens, display pins/blue-tack, yellow praise sticky notes

Arrival and starter

Arrival: Look at the two wall displays on screen. Why is Wall B easier to look at than Wall A?

Starter question: Why do galleries leave a clean space between each artwork on the wall?

Teacher model (I do)

Step 1: Write the art wall label card: I write my title 'Steel span'. Art tools 'Card, foil, and chrome paint' in clear black pen.

Step 2: Space the panel on the display strip: I place a hand-width spacer card next to the last panel so my board sits in a straight even row.

Step 3: Write a kind art show note: I look closely at a friend's panel. Write: 'Great shiny bolt dots on your arch!' on a sticky note.

Practice routes (Supported / Independent / Aspire)

Supported: Label done, panel spaced neatly,. One peer praise note given.

Independent: Full art wall label written, team row set outd evenly,. Two peer notes placed.

Aspire: Art wall label, art show welcome sign,. Three technical peer notes done.

TA and cover notes

TA focus: Run a flat level string line across the display board at pupil eye level and provide a 10 cm card spacer block so pupils can space frames evenly.

Staff prep: Staff preparation only: review a short guide on setting up a classroom art wall walk with physical spacer blocks and peer praise notes.
