Teacher and cover plan — One skill, three tries, one log entry

Pathway: TRACK · Week 2 Part 1 · Big question: How does repeating one studio skill across three controlled trials build measurable control?

Learning goals and studio kit

• Select one target skill from Week 1 (tonal shading, cross-hatching, or ink gradation).

• Complete three progressive trials (Trial 1 baseline, Trial 2 pressure adjustment, Trial 3 refined control).

• Record a clear studio log entry explaining what changed between Trial 1 and Trial 3.

Studio kit: Three-trial progression sheets, 2B/4B/6B pencils, fineliners, ink wash brushes, blending stumps, studio log frames

Arrival and starter

Arrival: Think about learning a sport or instrument. Why is trying a skill three times in a row better than trying it once?

Starter question: What is the most important step between finishing Trial 1 and starting Trial 2?

Teacher model (I do)

Step 1: Complete trial 1 (6-minute baseline): I draw my identity form in Box 1 using cross-hatching and stop to check where the tone looks patchy.

Step 2: Adjust angle and pressure in Trial 2: I write 'closer line spacing' under Box 1, then complete Box 2 with tighter, steadier strokes.

Step 3: Resolve trial 3 and write the log note: I complete Box 3 with three smooth tonal layers and write my reflection comparing Box 1 and Box 3.

Practice routes (Supported / Independent / Aspire)

Supported: Three progressive trials completed with ticked adjustment and reflection stem.

Independent: Three progressive trials with intermediate targets and a three-sentence technical log entry.

Aspire: Three progression trials, fourth toned-ground trial, and surface evaluation.

TA and cover notes

TA focus: Use a visible 6-minute timer for each of the three trials so pupils pace their practice evenly across all three boxes.

Staff prep: Staff preparation only: review a short clip on running timed three-trial deliberate practice strips in the art studio.
