Tier pack: Independent route — One skill, three tries, one log entry

Pathway: TRACK · Week 2 Part 1 · Big question: How does repeating one studio skill across three controlled trials build measurable control?

Independent route studio steps

Step 1: Draw your chosen identity symbol in all three progression boxes.

Step 2: Complete trial 1, write a one-line diagnostic target beneath it, and apply that fix in Trial 2.

Step 3: Refine full tonal range (highlight, mid-tone, core shadow) in Trial 3.

Step 4: Write a three-sentence studio log entry explaining how you adjusted pressure, angle, or dilution.

Success check

Three progressive trials with intermediate targets and a three-sentence technical log entry.

Key words helper

• trial: A deliberate practice attempt focused on improving one specific technique.

• pressure: How firmly or lightly you press the tool onto the paper surface.

• cross-hatching: Building dark tone by layering intersecting sets of parallel lines.

• control: Making the tool produce the exact tone and edge you intend.

• progression: Visible step-by-step improvement across consecutive attempts.

Review checklist

[ ] Point to the exact spot in Trial 3 that shows stronger control than Trial 1.

[ ] Check that your short adjustment note sits clearly under Trial 1 and Trial 2.

[ ] File your progression sheet neatly in your studio log.
