Pupil studio resources & worksheet — Plan and rehearse a studio skill demonstration

Pathway: TRACK · Week 6 Part 2 · Big question: How do we break a practical relief or surface technique into three teachable steps for peers?

Arrival check

Think about the best practical demonstration you have watched in art or tech. What made it easy to follow?

[ ] The teacher showed one clear step at a time using real examples

[ ] They gave one quick 'watch out for this mistake' tip

[ ] It was short, clear, and let us see the tool angle up close

Starter visual cues

Box 1 (Prep & Tool): Real sample of the raw card/foil + note on safe tool setup.

Box 2 (The action): Half-worked sample showing the technique in progress + pressure tip.

Box 3 (Finished result + Top tip): Completed sample tile + one troubleshooting rule.

Rehearsal: 90-second partner walk-through using the three boxes as visual anchors.

Vote: Why is gluing three real stage-by-stage sample tiles onto your demo board better than only writing sentences?

Studio practice planner

Build your three-step skill demonstration plan.

Shapes/Focus: Skill: Foil embossing + wipe, Skill: Dry-brush iron ridges, Skill: Laminated card gussets, Skill: Negative-space truss

Tools/Methods: Tile 1: Raw prep & mat, Tile 2: Active application, Tile 3: Resolved patina, Tip: Pressure & wipe control

Exit ticket

Why do we include a 'Step 2 (in-progress)' sample tile on a skill demonstration board?

[ ] So learners can see the middle working stage between the raw material and the finished piece

[ ] Because we ran out of paint on Tile 2

[ ] To make the board heavier
