# Tier pack: Independent route — Planning a gallery or exhibition inquiry

Pathway: SUMMIT · Week 5 Part 1 · Big question: How do we design a structured visual inquiry plan to analyse artworks in an exhibition space?

## Independent route studio steps

Step 1: Design and rule a structured A3 Exhibition inquiry sheet with dedicated zones for Spatial/Lighting map, Tonal skeleton, Surface detail, and Critical commentary.

Step 2: Formulate three original critical inquiry questions investigating material execution, tonal contrast, and curatorial staging.

Step 3: Execute a timed 5-minute pilot study on the preview plate to calibrate your shorthand hatching and annotation style.

## Success check

Custom four-zone inquiry sheet, three analytical questions, and timed pilot study completed.

## Key words helper

• inquiry framework: A structured set of visual lenses and sketching zones prepared before visiting or studying an exhibition.

• spatial layout: How artworks are positioned in relation to walls, plinths, lighting, and viewer pathways.

• execution: The technical skill and material control shown in how an artwork is physically made.

• juxtaposition: Placing two contrasting works or materials near each other to spark visual dialogue.

• critical question: An open analytical question that investigates how a work achieves its visual impact.

## Review checklist

[ ] Check that all four recording zones and your three inquiry questions are clearly laid out on your sheet.

[ ] Verify that your pilot thumbnail shows at least three distinct tonal values.

[ ] Store your prepared clipboard sheet safely for next week's exhibition session.
