Tier pack: Independent route — Designing a peer studio workshop project

Pathway: SUMMIT · Week 5 Part 2 · Big question: How do we design a structured, safe, and inspiring practical workshop to lead our peers in building a relief study?

Independent route studio steps

Step 1: Design a structured 15-minute studio workshop on your A3 Leadership board covering Timing (2-10-3 mins), Step-by-Step instructions, and Troubleshooting.

Step 2: Fabricate and mount three high-precision Stage Exemplar tiles illustrating the exact technical progression.

Step 3: Complete a formal Material specification and Risk/Contingency assessment.

Step 4: Pre-cut and package a participant kit of four base blanks ready for next week's live pilot.

Success check

Complete workshop Leadership board, three mounted stage exemplars, risk check, and prepped participant kit.

Key words helper

• workshop brief: A structured teaching plan that guides participants to make a finished study in a set time.

• scaffolding: Breaking a complex studio technique into manageable, foolproof stages with visual models.

• risk assessment: Identifying practical hazards (cutting edges, foil corners, spills) and putting safe controls in place.

• contingency: A smart backup plan if a material runs low or a participant's piece lifts.

• facilitation: Guiding and coaching peers calmly so they succeed with their own hands.

Review checklist

[ ] Check that your three physical stage tiles are firmly mounted and clearly labelled Step 1, Step 2, and Step 3.

[ ] Count the pre-cut participant blanks in your workshop wallet so you are 100% ready for Week 6.

[ ] Verify that your Risk & Contingency section names at least two safety controls.
