Tier pack: Supported route — Designing a peer studio workshop project

Pathway: SUMMIT · Week 5 Part 2 · Big question: How do we design a structured, safe, and inspiring practical workshop to lead our peers in building a relief study?

Supported route studio steps

Step 1: Choose your workshop skill (foil embossing or dry-brush relief).

Step 2: Make and glue three small stage tiles (Step 1, Step 2, Step 3) onto your Workshop leader board.

Step 3: Tick the materials you need on the kit checklist and write one clear safety rule.

Step 4: Prepare four blank base squares in a wallet ready for Week 6.

Success check

Three stage tiles mounted, kit list ticked, safety rule written, and four participant blanks prepped.

Key words helper

• workshop brief: A structured teaching plan that guides participants to make a finished study in a set time.

• scaffolding: Breaking a complex studio technique into manageable, foolproof stages with visual models.

• risk assessment: Identifying practical hazards (cutting edges, foil corners, spills) and putting safe controls in place.

Review checklist

[ ] Check that your three physical stage tiles are firmly mounted and clearly labelled Step 1, Step 2, and Step 3.

[ ] Count the pre-cut participant blanks in your workshop wallet so you are 100% ready for Week 6.

[ ] Verify that your Risk & Contingency section names at least two safety controls.
