Teacher and cover plan — Piloting, leading and adapting the studio session

Pathway: SUMMIT · Week 6 Part 2 · Big question: How do we run a live pilot of our workshop sequence, spot material bottlenecks, and adapt our instructions?

Learning goals and studio kit

• Lead a timed 10-minute live pilot of your Week 5 studio workshop with a partner or small table group.

• Observe where participants hesitate or encounter a material bottleneck (pacing, tool grip, glue amount, or wipe timing).

• Adapt and upgrade your Workshop leadership Board with a concrete improvement before the Week 7 showcase.

Studio kit: Week 5 Workshop leadership Boards, prepped participant blank wallets, foil/card/wash trays, studio timers, Pilot adaptation log cards

Arrival and starter

Arrival: Why do museum educators and studio leaders always run a live 'pilot test' of a new workshop with a partner before delivering it to a wider audience?

Starter question: What is the smartest response if, during your pilot run, your participant runs out of time on Step 2 (cutting and laminating strips) before reaching Step 3 (patina)?

Teacher model (I do)

Step 1: Lead the 8-minute live pilot: I brief my partner on safety, hand them a pre-cut base blank, and guide them through Tiles 1, 2, and 3 while watching the timer.

Step 2: Diagnose the live bottleneck: I notice my partner pressed the stylus too hard and tore one foil corner because the foam mat slipped.

Step 3: Adapt my board and kit: I tape the foam mat to a backing board, add a bold red tip on Tile 1 ('Use medium pressure on taped foam'), and log my adaptation.

Practice routes (Supported / Independent / Aspire)

Supported: Partner pilot completed, one upgrade added to board, and peer tile mounted on log.

Independent: Timed pilot delivered, board/kit adapted, and peer tile mounted with 3-part reflection.

Aspire: Split-timed pilot, upgraded dual-level cues, mounted peer tile, and critical evaluation.

TA and cover notes

TA focus: Run an 8-minute timer for Pilot round 1 and an 8-minute timer for Pilot round 2 so both partners get equal time leading and testing.

Staff prep: Staff preparation only: review how to run a paired 8-minute workshop pilot and guide pupils to log concrete

instructional adaptations.
